Summary

Senior Backend and Cloud Engineer with 5 years of hands-on experience building backend systems, cloud infrastructure, and production platforms across AI, IoT/edge, e-commerce, and internal business systems. Strong in Python (Django, Django REST Framework, Flask) and C# (.NET / ASP.NET Core), with practical ownership across REST APIs, PostgreSQL-backed services, CI/CD, Docker, Linux, and cloud deployments on Azure, GCP, and AWS. Experienced in architecture planning, implementation leadership, and cross-functional delivery, with hands-on strength in AWS IoT Greengrass v2 and NVIDIA Jetson-based edge operations.

Skills

Backend: Python, Django, Django REST Framework, Flask, C#, .NET Core, ASP.NET Core, REST APIs, WebSockets, microservices

Frontend / Full Stack: Next.js, React, TypeScript, Tailwind CSS, WordPress, Shopify, Flutter, WPF

Databases: PostgreSQL, MySQL, MSSQL, SQLite, Redis, Firestore, Neon, DynamoDB

Cloud: Azure, Google Cloud Platform, AWS, Firebase, DigitalOcean, AWS IoT Greengrass v2

DevOps / Infrastructure: Docker, Git, GitHub Actions, CI/CD, Linux, Nginx, Caddy, VPS, cPanel, WHM

AI / Edge: NVIDIA Jetson, OpenCV, Ultralytics YOLOv8, PyTorch, TensorFlow/Keras

Tooling / Collaboration: Jira, Atlassian, Confluence, Power BI

Languages: Arabic (native), English (C2), Turkish (B2), Swedish (A1)

Experience

Senior DevOps Engineer | Cognitro AI

USA, Remote | 10/2025 – Present

- Lead AWS-based edge deployment and operations for Lululemon through the Mantis IV platform, architecting reliable application delivery, OTA updates, and health monitoring across an expanding fleet of NVIDIA Jetson devices.
- Built the initial end-to-end production phase for Replen, a US sales forecasting platform, utilizing a Next.js frontend, Django/DRF backend, and secure CI/CD pipelines.
- Developed Python and Bash-based AWS IoT Greengrass v2 components to enable offline-resilient device operations, automated bootstrapping, and secure execution of cloud-commanded tasks.
- Defined overarching cloud architecture, system boundaries, and DevOps strategies across both edge infrastructure and internal enterprise platforms.
- Implemented supporting AWS workflows using IoT Core, Greengrass v2, S3, DynamoDB, Lambda, API Gateway, Cognito, SQS, EventBridge Pipes, CloudWatch, and IAM.

Digital Solutions Architect | The Home Co EG

Egypt | 04/2025 – Present

- Led digital transformation across operations, infrastructure, and commerce systems.
- Built a Next.js + PostgreSQL pricing platform with RBAC, auditability, bilingual exports, and faster quotation workflows.
- Delivered and operated a headless Shopify + Next.js storefront for thehomecoeg.com, alongside domain, email, reporting, and Power BI-based sales analysis workflows.

Part-time Technical Lead | Kiwify Tech Company

Mersin, Turkey | 06/2024 – 10/2025

- Led delivery of 10+ client projects across ASP.NET Core APIs, WordPress, and Flutter while owning architecture, deployments, and hosting operations across VPS and shared-hosting environments.
- Architected an Arabic-first order management platform using ASP.NET Core, PostgreSQL, JWT authentication, and DTO/Repository/Service layering.

Product Engineer | Domogreen

Lund, Sweden | 07/2024 – 04/2025

- Delivered a secure Flutter desktop application backed by Django REST Framework, Redis, and WebSockets for a research collaboration platform.
- Owned backend delivery, JWT-based security, and a hybrid on-prem + GCP deployment model, reporting directly to the CEO.

Computer Vision and Backend Engineer | Animals AI

Helsingborg, Sweden | 08/2023 – 04/2024

- Started in computer vision, then moved into backend and cloud ownership within the first months of the role.
- Cleared backlog across 30+ models and 50+ data pipelines, then took over backend and infrastructure responsibilities.
- Built Jetson-based AI and IoT computer vision pipelines using PyTorch, OpenCV, and YOLOv8 while developing Flask-based backend services on Google Cloud and Firebase-backed workflows.
- Improved detection accuracy by ~20% while supporting end-to-end farm operations, containerized training and deployment flows, mentorship, and direct collaboration with researchers and farmers.

IT Infrastructure Intern | Toros University

Mersin, Turkey | 07/2022 - 09/2022 and 03/2023 - 07/2023

- Supported university IT operations across Windows/Office, networking, VoIP, hardware maintenance, lab computer refurbishment, basic server administration, and operational documentation.

Freelance Full-Stack Developer

Mersin, Turkey | 09/2021 - 09/2022

- Delivered WordPress, Wix Velo, PHP/Laravel, and static websites for SME clients while owning SEO, content workflows, hosting, domains, and production updates.

Education

Toros University | B.Sc. in Computer and Software Engineering

Mersin, Turkey | 09/2019 – 07/2023

- Graduated first in department and faculty, GPA: 3.77/4.00
- Graduation project: self-driving car using TensorFlow and Keras
- Contributed to the computer vision backend of an autonomous harvesting robot as part of a team ranking in the Top 25 at Teknofest 2023.

Certifications and Courses

- AI Engineer Internship (Animals.ai)
- AI Engineer (Toros University Smart Lab)
- Self-Driving Car: Applied Deep Learning (Udemy)
- Python Bootcamp: Zero to Hero (Udemy)
- Go: The Complete Guide (Udemy).
